MOTOR YACHT

## Introduction

At the heart of Rustler Yachts' philosophy is a firm commitment to developing truly unique sailing yachts and motor yachts that are distinctive in looks, design and performance.

Famous the world over for sailing yachts, our aim has always been to produce yachts that deliver a great on the water experience through the fusion of excellent design and meticulous build quality. This new motor yacht is no different.

## Exterior

The new Tony Castro designed Rustler 41MY exudes an elegance and refinement seldom seen in this segment. A deep 'V' planning hull allows ease and control in slow mode, and huge fuel efficiencies when at speed.

The ergonomic deck layout is easy to move around on, in comfort and safety. The upper deck level is versatile and allows comfort at sea and in port, and with ease-of-access gates on both side of the cockpit, access to and from the dockside is a simple elegant process.

A large, dry, quiet and versatile social area, with a galley bar extension ensures that everyone onboard can relax in comfort.

### The Designer

Designer Tony Castro has been designing sailing and motor yachts since around 1980, with more than 10,000 boats launched, ranging from custom boats and one-design production models to superyachts. It has been a pleasure to work with Tony and his talented team to produce an elegant, useable and manageable motor yacht.

## Interior

High class joinery, combined with stylish practical designs set all Rustler Yachts apart. Quality is found in every curve, every surface, every detail. Elegant solutions have been designed to make the best use of space, allowing comfort and safety in all weathers.

Rustler's attention to detail, the fit and the finish, is as perfect as it can be.

## The Journey

Each Rustler owner enjoys a uniquely close relationship with the team that builds their boat, beginning with the process of the individually tailored design.

Many customers wish to be involved from the early design stages of their build, shaping the specification, interior layout, textures and overall appearance to meet detailed requirements.

A tour of our Falmouth facility will inevitably end with a new appreciation of the passion for fine craftsmanship and the pride in all that goes into every one of our yachts. We encourage visits as your boat progresses through the process.

## Sustainability

Rustler Yachts' commitment to sustainability is now stronger than ever. We are investing our time, resources and energy to make our operations and products more efficient. We source responsibly, to improve the health, safety and well-being of our team and our customers.

Features such as the planned use of bio resins, recycled core material and sustainable timbers, ensure that our products are manufactured in a forward-thinking manner commensurate with best practice.

Max*	35 knots	

\* Dependent upon engine choice

# Beautiful Yachts Beautifully Built

## History

The Rustler name was first established in the mid nineteen sixties, and since that time the brand has developed into a range of attractive and individual craft that are a pleasure to own.

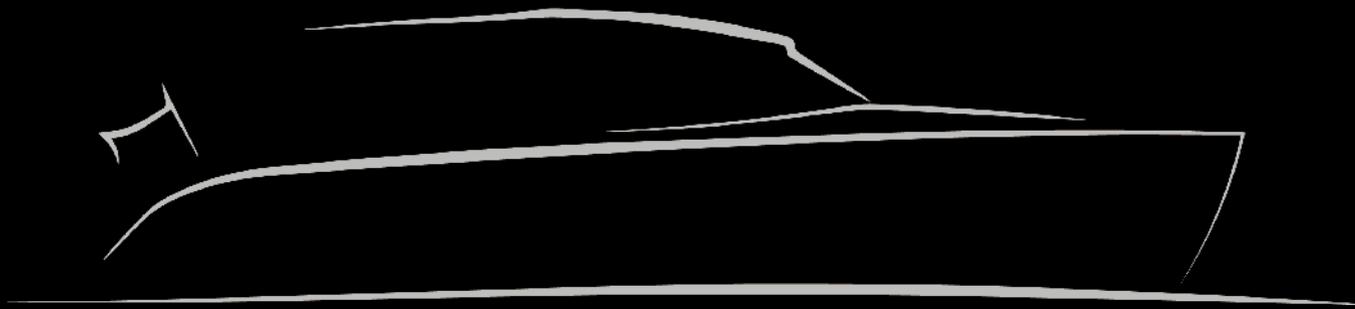

There are hundreds of Rustler Yachts all around the world, built with passion in Cornwall.
